“The Fast Radio Sky”:

A lecture with the 2015 Canada Council Killam Prize Laureate in Natural Sciences, Professor Victoria Kaspi

Victoria Kaspi has made important contributions to the understanding of the universe, with major discoveries throughout her career in the study of rapidly spinning compact neutron stars called pulsars.

She holds a Canada Research Chair and the Lorne Trottier Chair in Astrophysics and Cosmology at McGill University, where she is also the Director of the McGill Space Institute.

January 12, 2016

**Lecture:
5:30 – 6:30 p.m.**

**Tanna Schulich Hall
527 Sherbrooke St. Ouest,
Montreal, QC.**

Established in 1965, the Killam Trusts comprise some \$425 million (Cdn), the income on which is largely devoted to scholarships at the graduate and postgraduate levels in Canada. Funding for the Killam Trusts came from Izaak Walton Killam and his wife Dorothy J. Killam with the intent of advancing research in Canada.
